

SCHOLARSHIP APPLICATION

The American Council of Engineering Companies of Delaware (ACEC/DE) is the voice of Delaware's engineering industry. ACEC/DE members are engaged in a wide range of engineering works that propel the State's economy and enhance and safeguard Delaware's quality of life. These works allow Delawareans to drink clean water, enjoy a healthy life, take advantage of new technologies and travel safely and efficiently. Our mission is to contribute to Delaware's prosperity and welfare by advancing the business interests of member firms.

ACEC's roots date back to 1909 when a loosely organized group of engineers in private practice established the American Institute of Consulting Engineers (AICE), the forerunner of ACEC. Today ACEC is a large federation of 51 state and regional councils representing the great breadth of America's engineering industry. ACEC member firms employ hundreds of thousands of engineers, architects, land surveyors, scientists, and other specialists, responsible for more than \$200 billion of private and public works annually. Member firms range in size from a single registered professional engineer to corporations employing thousands of professionals.
